# National List of Beaches

## What is the National List of Beaches?

The Beaches Environmental Assessment and Coastal Health Act (BEACH Act) requires EPA to develop and publish a list of discrete coastal recreation waters adjacent to beaches or similar points of access that are used by the public that specifies whether the waters are subject to a monitoring and notification program consistent with the *National Beach Guidance and Required Performance Criteria for Grants* (July 2002). This document, the *National List of Beaches*, fulfills this requirement. This list is primarily organized by state and county. For some territories and Hawaii, the beaches are listed by island. Alaska's beaches are reported alphabetically. Tribal beaches are listed by name. Beach names are listed with their monitoring status for the 2010 swimming season. We include only coastal and Great Lakes beaches in these lists. The list does not include beaches on inland waters because they are not subject to the BEACH Act.

This document gives both EPA and the public a national picture of the extent of monitoring of beach waters, and it will help EPA determine how to better implement the BEACH Act.

## How did EPA get this information?

States, territories and tribes provided the information to EPA as of September 1, 2011. The table on this page lists the states, territories and tribes, the number of beaches they reported, and how many of those beaches were monitored.

## How do I find more information about the List of Beaches?

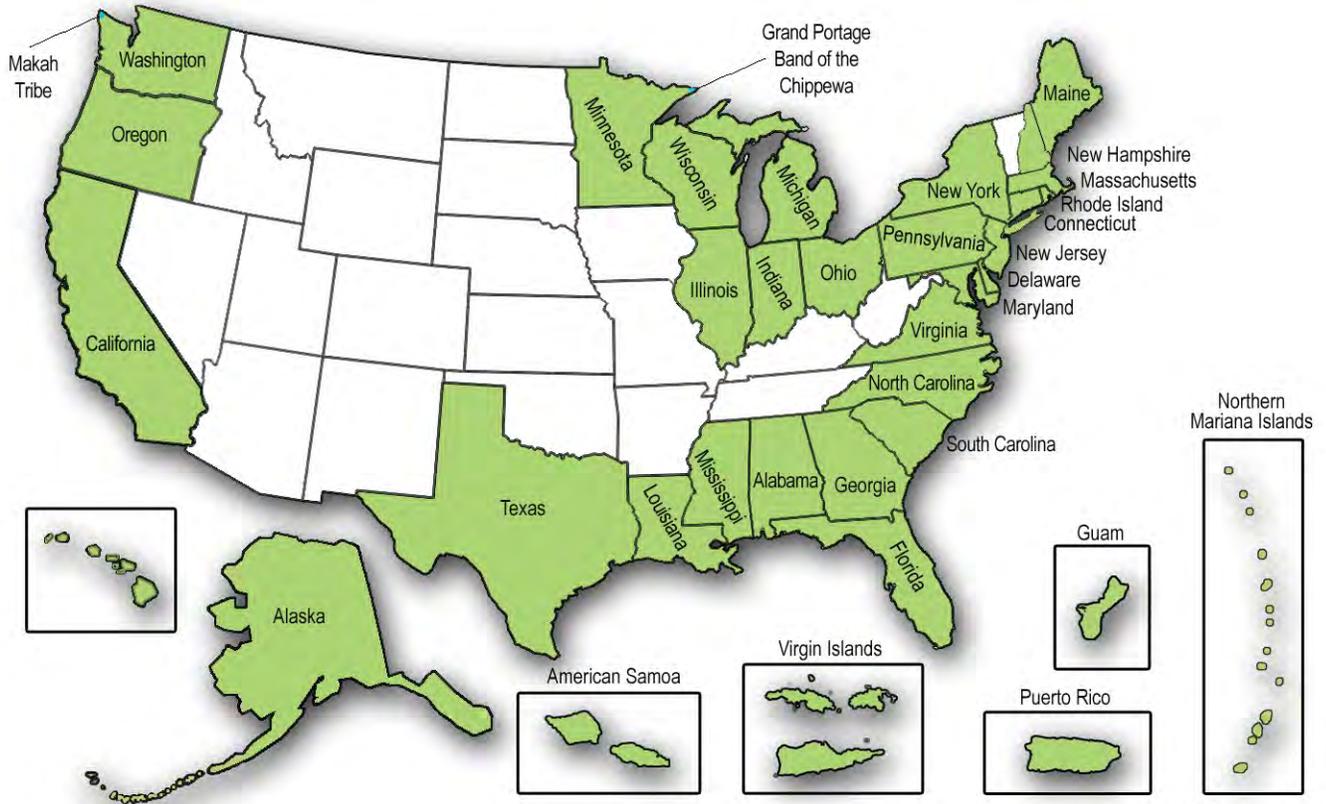

For more information on the *National List of Beaches* please contact Richard Healy by telephone at 202-566-0405 or email him at [healy.richard@epa.gov](mailto:healy.richard@epa.gov). For information about specific beaches contact your EPA Regional or state beach representative at: [http://water.epa.gov/type/oceb/beaches/whereyoulive\\_state.cfm](http://water.epa.gov/type/oceb/beaches/whereyoulive_state.cfm).

## How will this list change?

Starting with the 2011 swimming season, the list of beaches will be dynamic, linking each beach to its page in BEACON (Beach Advisory and Closing On-line Notification) at: <http://watersgeo.epa.gov/beacon2/>. Each page will show the extent of the beach, provide the most recent advisory status and water quality monitoring data that the state has reported, and link to the state's website for the most up-to-date information.
